In 2001, motorcycle crashes in the U.S. increased by 0.57% and motorcycle fatalities increased by 3.89%.

In 2001, there were 76,337 reported motorcycle crashes and 2,909 fatalities compared with 75,904 crashes and 2,800 fatalities in 2000. The ratio of motorcycle crashes per 10,000 registered motorcycles was 167.39, a decrease of 2.69% from 2000. The ratio of fatalities per 10,000 registrations was 6.38, increasing 0.47% from 2000. The ratio of fatalities per 100 crashes increased to 3.81 in 2001, up 3.25% from 2000.

The statistics and information are obtained directly from all 50 states and the District of Columbia and are a result of surveying licensing authorities in the nation's 51 licensing jurisdictions. When a state's crash figures are not available, we provide their most recently submitted data. Criteria for reporting crashes to the police varies from state to state. Crashes with only minor property damage and those occurring on nonpublic or private property are sometimes not reported.

For 2001, the number of registered motorcycles in the United States was 4,560,424 - an increase of 3.35% from 2000. Registration figures provided by the states may include vehicles other than motorcycles, such as mopeds and off-highway vehicles. Also, the vehicle types that are included in registration totals may not be comparable with those included in crash and fatality reports for each state.

The Motorcycle Safety Foundation (MSF) and the National Highway Traffic Safety Administration (NHTSA) cooperatively support motorcycle crash countermeasures: rider education, high-quality licensing programs, and the promotion of

safe and responsible riding. The MSF and the NHTSA also recommend wearing helmets and other protective clothing to reduce injuries if a crash does occur.

The MSF has research-based rider education courses for beginning and experienced riders. The MSF's program support includes RiderCoach and RiderCoach Trainer certification courses and recognition of qualified sponsors to conduct training based upon minimum national standards. RiderCoursesSM are conducted throughout the country and at military bases worldwide.

Fifty states and the District of Columbia have adopted improved motorcyclist-licensing programs. The MSF, in cooperation with the American Association of Motor Vehicle Administrators, provides technical assistance and support materials in licensing improvement.

Other programs include: educating motorcyclists on the risk of using alcohol and other drugs while riding; educating automobile drivers on the importance of actively seeing and sharing the road with motorcyclists; providing safety literature and display materials to the public; and recognizing outstanding motorcycle-safety achievements through an awards program. For more information, please contact the Motorcycle Safety Foundation at (949) 727-3227.

The Motorcycle Safety Foundation (MSF) is a national, not-for-profit organization dedicated to promoting safe and responsible motorcycling. We have programs in rider training, operator licensing and public information. The MSF is supported by the U.S. distributors of BMW, Ducati, Harley-Davidson, Honda, Kawasaki, KTM, Piaggio/Vespa, Suzuki, Victory, Vengeance and Yamaha motorcycles.
